Bachelor of Engineering
Chitkara University, Punjab

Education

•Bachelor of Engineering in Computer Science *2021-25*
Chitkara University, Punjab

•Senior Secondary CBSE *2019-20*
B.B.M.B D.A.V Public School, Nangal town,Rupnagar

Experience

BridgeLabz (Business Analyst Intern) *Feb 2025 – Present*

– Undergoing training for the Business Analyst role
– Gained proficiency in Python, Git, and SQL
– Working on real-world projects to apply learned skills effectively

Personal Projects

•E-Book Store

Worked on an online bookstore platform, enhancing user experience and decision-making through data and design.

– Conducted requirement analysis with use cases, DFDs, and MoSCoW prioritization; built Figma prototypes, maintained RTM, supported UAT, and performed post-implementation review.
– Led the full business analysis lifecycle: identified stakeholders, gathered functional/non-functional requirements, and created BRD, FRD, SRS, and user stories using JIRA and Trello for task tracking.
– Utilized Power BI for creating insightful dashboards to analyze user behavior, sales trends, and system performance for data-driven decision-making.

•Flappy Bird Game (Java)

Developed a Flappy Bird clone using Java, featuring collision detection, smooth gameplay.

– Developed a Flappy Bird game using Java, implementing game mechanics including gravity, collision detection, and score tracking..
– Implemented object-oriented principles for modular code structure, improving maintainability and future feature additions.

•E-Insurance Application

Key Responsibilities and Experience in E-Insurance Application Requirements Analysis.

– Analyzed and documented functional and non-functional requirements for a large-scale e-Insurance application following the Sequential Waterfall Model.
– Created detailed BRD and FRD, along with structured requirement classification; documented user stories with acceptance criteria to ensure clarity and traceability throughout the SDLC.

•Music Player (Python)

Built a functional desktop music player with a graphical user interface using Python.

– Used Tkinter for the GUI and pygame for audio playback.
– Features include play, pause, stop, next/previous track, volume control, and playlist management.
– Designed an intuitive and responsive UI with buttons, sliders, and file dialogs.

Technical Skills and Interests

Languages: C/C++,Java, Python, Javascript
Dev Tools: VScode, Git, Github, Power BI, Trello, Jira, Figma
Databases: MongoDb, Relational Database(MySql)
Soft Skills: Problem Solving, Self-learning, Presentation, Adaptability

Certificates

Google UX Design | Coursera
Google Analytics for Beginners | Google Analytics Academy
Introduction ToCyber Security | Cisco
JavaScript For Beginners | Udemy
OOPS In Java | Infosys
